

Dear Revd Mr Nile,

Thanks to the Premier for protecting Koalas.

Farmers are recovering from the worst drought in history, horrific bushfires and a recession, with stock numbers depleted, pastures recovering, heavy deferred debt and a massive threat to profits due to over-reliance on China. New infrastructure for the bush is on the cards.

Yet NSW Nationals MPs choose the right to kill Koalas as a reason to start a brawl that could cause big farming benefits to be quickly unwound by public reaction.

What a great PR & profit opportunity "Caring for koala's" could be for rural NSW. Please encourage sensible compromise.

Greg Bloomfield

4th gen farmer; former NSWF Branch Chairman
